IF TRANSACTION IS CONFIRMED AS AN AVERAGE OF THE REPORTED PRICES, DETAILS AVAILABLE ON REQUEST.

**Adjusted Options:** Many standardized options are adjusted as a result of corporate transactions such as stock dividends or stock splits. The number of shares represented by one option contract is adjusted to reflect the change in the number of shares outstanding.

percentage of the option may be adjusted and the option exercise price, expressed as a price per share of the shares subject to the option may also be adjusted, as described in The Options Clearing Corporation's *Standardized, Unified Characteristics and Risk of Standardized Options*, as amended ("Brochure"). The contingencies provided for transactions in standardized options that have been affected by such adjustments will disallow adjustment to the abbreviation "OE". The adjusted number of shares deliverable upon exercise of such option, and will disallow adjustment to the abbreviation "ESOP", the estimated adjusted strike price, expressed as a price per share, for the shares subject to the option, all calculated in accordance with the definitions set forth in the Brochure.

Investment securities and products are NOT FDIC insured, are NOT obligations of or guaranteed by any bank, and are subject to loss of principal without interest (excluding for certain preferred certificates of deposit, which are also subject to certain risks).

Associated net security-value: continuously to prepare, actual yield may vary according to the rate at which the underlying securities or other financial assets are received. Information concerning risks that affect yield (including all relevant estimated yield, weighted average life, and the prepayment assumptions underlying yield) furnished upon written request.

**Adjusted Options:** When a shareholder's options are adjusted as a result of corporate transactions, such as stock dividends or stock splits, the number of shares deliverable upon exercise of the option may be adjusted and the option exercise price expressed as a price per share of the shares subject to the option. For example, if a company has 100 million shares outstanding and 10 million options outstanding, and the company declares a 10% stock dividend, the number of shares subject to the option may be adjusted to 11 million shares, and the exercise price may be adjusted to 90% of the current market price of the shares. The adjusted number of shares deliverable upon exercise of such option, expressed as a price per share, for the shares subject to the option, all calculated in accordance with the descriptions set forth in the Goodnote.

Investment securities and products are NOT FDIC insured, are NOT obligations of or guaranteed by any bank, and are subject to LOSS of the principal amount invested (except for certain insured certificates of deposit, which are also subject to certain risk).
